

Scientific Arguments Against Undirected Naturalism

Dr. Don Johnson holds doctoral degrees in both natural and informational sciences. He worked for 10 years as a senior research scientist in the pharmaceutical and medical and scientific fields and taught for 20 years in universities in the US and Europe. He has made thought-provoking presentations on most continents. These books highlight science (no religious stance and are appropriate for use in public schools) with over 350 references.

PN&NP counters unsubstantiated claims purported to be science, especially in areas of origins of mass/energy, life, and species. It debunks misconceptions concerning intelligent design, and highlights ID's contributions.

"It is a clear condensed version... to get a fresh perspective about the challenging question regarding the origins of life. I... was impressed w/ the soundness of the logic the author displayed and the supporting methodology. His references were overwhelming and I was surprised at how many actual scientists agreed with him." Greg McElveen

"It's a wonderful book that lays out the arguments in support of ID in a clear and concise manner.... The questions it raises are bound to stump even the most vociferous anti-IDists!" Robert Deyes

"Your book was concise, objective and of great value." Steve McMillan

POL highlights the informational aspects of life that are usually overlooked or ignored in chemical and biological evolutionary scenarios. Each cell of an organism has thousands of interacting computers reading and processing digital information using algorithmic digital programs and digital codes to communicate information.

"You have presented us with an amazing array of quotations from world-class scientists of all persuasions... so much irrefutable information." Jim Pappas.

Author "is uniquely qualified to unpack the strong parallels between everyday cybernetic design and engineering and the workings of the cell. I highly recommend this book." David Abel

"This is... the best book covering the relationship between genome and computer architectures." Jonathan Bartlett

"This book addresses head on an issue which has been retarding understanding of life--failure to adequately consider its information processing aspects." M. Hedge
See scienceintegrity.net for updates and details on the books (e.g. possible Free or educational cost reimbursement) and videos, and other services, including presentations or consultation on life's information or ID.

My books are totally secular, using only empirical and known science to prove that nature demonstrates intelligent design (ID), implicitly in PoL. No claim is made as to the identity of the agent of design, which is a philosophical or theological belief (as opposed to empirical science). As such, the books are totally non-religious, and would be appropriate for secular schools or other venues. PN&NP-Lite is the best book for Biblical support (it's explicitly pro-ID). PoL is the strongest argument against Darwinism, exposing the fallacies of attempts to explain life's information systems from physical interactions. A secular professional video (DVD & on-line) to accompany PoL is available ([links at djpol.info](http://links.at/djpol.info)).

My secular scienceintegrity.net deals only with science, describing my background, books, and secular presentations in which the Bible or promoting religious doctrine would be inappropriate. The books and secular presentations break down the intellectual barriers that prevent seeing the reality of design. Unfortunately, many people (especially scientists) dismiss out-of-hand any evidence that has any religious implications. I don't try to hide my Christianity, but I don't advertise it for a purely secular presentation since the evidence (being purely science) presented does not depend on my faith. Although I prefer presenting ID in secular venues (e.g. arranged by Christian professors), I have sometimes used churches or Christian schools. One outreach technique that has proved effective is to have a purely secular ID presentation to which skeptics and unbelievers are invited, followed (perhaps the following evening) by "Amazing Scientific Insights of the Bible" to describe who I believe the Designer is and why.

My Bible-based Website (www.djgo.info) has faith-based information and presentation links; e.g. "Science Christians Need to Know" (not too technical) and a 6-part series on creation/evolution & science facts that go beyond empirical science to explain beliefs and the reasons for those beliefs. As I've pointed out to Christian audiences, if I could prove that the God of the Bible is the Designer, faith would be unnecessary since the Christian God would be proven scientific fact. My ministry to Christians is to build up the Saints and equip them to teach their children and defend their faith in a scientifically-based and intellectually satisfying manner, as well as increasing one's confidence that the Bible is truly amazing in its scientific insights. Several churches have had me do a sermon on the Biblical basis for studying science, followed by an evening session on "Amazing Scientific Insights of the Bible."

It takes effort and dedication to become equipped to counter the pseudo-scientific speculations that are portrayed as science. Many people find my books and presentations challenging, mainly because they don't have the background or desire to learn science (their minds often shut down because of scenarios falsely presented as fact – see ussci.info). I became extremely interested in science by age 8, and developed into a staunch evolutionist by age 10. My parents and Sunday School teachers were unable to answer my science concerns that seemed to contradict the Bible. Thankfully, God drew me into His Kingdom, and I accepted Jesus as savior at age 12. But nobody was able to counter what I erroneously believed was scientific truth, so I continued to believe in and teach chemical and biological evolution for another 18 years after becoming a Christian! My books and presentations are resources for the battle. Email inquiries or desire for email updates to djbiblescience@gmail.com. – Don
